

Typography principles

→ Effectively communicate the message to the reader

✓ Use defined styles

Use typography styles consistently. This makes it easier for users to **scan through information** and make the interface feel more cohesive. Always use mixed case – no uppercase.

✓ Emphasize what is important

Use size and color **contrast for hierarchy** and emphasis. Avoid small differences.

✓ Be legible

Headers summarize content and body text provides more detail. This **reduces cognitive load**.

✓ Improve readability

Improve readability by using white space. Draw the eye to the essentials. Longer body text must always be **left-aligned**.

✓ Ensure accessibility

Consider factors such as font size, contrast, and line spacing to ensure that all users can **engage with the content**.
